

## INSTRUCTIONS FOR WORKSHOP PRESENTERS

### **Vision for Human-Computer Interaction (V4HCI) Workshop**

in conjunction with CVPR 2005

Tuesday, 21 June 2005

The Catamaran Hotel

San Diego, CA

#### **Presentations**

Some papers (called *Feature Papers*) have been allotted 20 min, while others (called *Regular Papers*) have been allotted 15 min. Please refer to the Workshop Program. The allotted times include setup time, presentations, and questions/answers. Due to a pretty tight schedule, the Workshop Chairs will be closely following it.

The presentations should be in PowerPoint or PDF format. You are encouraged to bring your own laptop. The alternative to having your own laptop is to bring your presentation on a CD (not DVD), and to use the Workshop Chair's laptop.

The dress code will be "casual" (see the pictures from our 2004 RTV4HCI Workshop at <http://rtv4hci.rutgers.edu>).

Regarding the presentation content, please allow around 2 minutes per slide (so that the audience can digest the presented information), be brief and concise, and carefully time your presentation.

#### **Posters**

We invite all V4HCI presenters to bring posters about their papers. We have arranged with the CVPR organizers to provide poster stands that can be on display throughout the day of the Workshop. This will allow people that are unable to attend your talk to still find out about your research, and it will serve as advertising for people that can attend.

Each poster board is 40" (100cm) by 60" (150cm). You can choose between portrait or landscape orientation, but portrait is recommended.

Push pins and tacks can be used to mount posters on these boards.
